Information on the products

The tomatoes

Since mid-November, tomatoes only come from Florida. Volumes were relatively low and markets have suffered the consequences. We believe that the volume of tomatoes will go up after Thanksgiving in the United States. This should cause markets to decline for the month of December. The quality is excellent.

The peppers

Green peppers from Florida began in mid-November at low volume. More volume is expected for the month of December on the condition that the temperature remains ideal. The quality of this product is excellent.

The cucumbers

Leamington Ontario has almost no English cucumbers because of colder temperatures and low sunlight. The majority of cucumbers come from Mexico. This region has less volume than usual and prices remain high. We expect more or less stable markets for the month of December.

The onions

Our red onions come from Oregon who offers superb quality. The price should remain stable for the month of December.

Transport

The transport situation remains the same. Export is slowing because of the parity of the dollar and the current economic environment. Therefore fewer trucks are available for the return to Quebec from the United States. Transport costs remain high and further increases are expected in December especially for the holiday season.

Our mission

Our company is specialized in food safety. Our mission is to offer our institutional and retail customers fresh, washed and ready-to-eat fruits and vegetables. We also suggest programs adapted to our clients' needs, including closely related products. We focus on Canadian markets and territories of the North-eastern United States. Conscious of current realities, we emphasize the use of ecological products at every level of our operations.

The Groupe Tomapure team wishes you Happy Holidays!

On behalf of the entire team, our warm wishes of happiness, health and prosperity to you and your family during the holidays!

Thank you for your trust!
