## PRODUCT INFORMATION:

### TOMATOES:

We are receiving the tomatoes from Georgia and now they are packed in Quincy, on the northwest of Florida. Some producers have started their production in Florida (Plant City, Palmetto and Ruskin) at very low volume. From the 10th of November, we will be receiving them 100% from Florida.

## THE PEPPERS

Green peppers are currently imported from Georgia. Production in Florida, Plant City area, should begin the 10th of November.

## THE CUCUMBERS

The volumes of greenhouse cucumbers are usually lower during the period of November and December because of the cold and the short duration of sunshine during the day. This can result in a rising market.

## THE ONIONS

We are receiving them from Oregon and their quality is excellent.

## THE TRANSPORT

Following the situation of our dollar and economic crisis in the U.S., exports to this country is at its lowest level. For this reason, there are fewer trucks available for return to Canada. It is the law of supply and demand and price increases are expected.
